NEW JERSEY ACADEMY OF SCIENCE
**2024 NJAS COLLOQUIUM FOR
LIFE (LEADERSHIP, INNOVATION, FELLOWSHIP &
EXCELLENCE) IN STEM**

This virtual colloquium is an initiative of the NJ Academy of Science that aims at empowering middle school and high school students' perspectives on diverse scientific themes. The focus is to cultivate an interest in Science, Technology, Engineering, and Math (STEM) or health sciences by providing a space for students to showcase their expository writing, art, topical presentation, or research initiative to our scientific community. The colloquium is meant to raise a discussion regarding scientific cutting-edge topics and enhance STEM awareness by enhancing delivery of diverse scientific media styles. All (novice or expert) presenters are welcome to present or showcase their scientific piece and gain feedback from the NJ Academy of Science community.
